

EXPERIMENT-8

ROLL NO: 240701556

Name: Tarun Antony M

Procedure

1. The tool used for designing the wireframes is **Balsamiq Wireframes**.
2. A new project was created with mobile screens to simulate the complete shopping experience.
3. Each screen represents an important step in the product browsing and purchasing process.
4. UI components such as buttons, text fields, dropdowns, images, and icons were selected from the built-in library.
5. The wireframes were designed to be simple, clean, and focused on user interaction and smooth navigation.

User Flow

1. **Homepage** – Users can explore featured products, search for items, and navigate categories.
2. **Categories Screen** – Displays product categories like Electronics, Fashion, and Home.
3. **Product List Screen** – Shows products with image, name, price, and “Add to Cart” option.
4. **Product Details Screen** – Provides detailed product information and purchase option.
5. **Checkout Screen** – Displays cart items, total cost, and delivery address input.
6. **Payment Confirmation Screen** – Offers payment options and confirms successful purchase.

Screens Overview

Homepage

Components:

- Search bar
- Offer banner or carousel
- Category navigation buttons
- Featured products with image, price, and “Add to Cart”

Purpose:

Acts as the entry point where users begin browsing and interacting with products.

Categories Screen

Components:

- Grid or list of categories
- Icons/images representing each category

Purpose:

Helps users quickly filter and navigate products based on their interests.

Product List Screen

Components:

- Scrollable product list
- Product image, name, and price
- “Add to Cart” button

Purpose:

Allows users to browse and select products within a chosen category.

Product Details Screen

Components:

- Image gallery
- Product title, price, and ratings
- Description and specifications
- “Add to Cart” button

Purpose:

Provides detailed information to help users make purchase decisions.

Checkout Screen

Components:

- Cart items with price breakdown □ Delivery address input fields
- “Proceed to Payment” button

Purpose:

Enables users to review their order and provide delivery details.

Payment Confirmation Screen

Components:

- Payment options (UPI, Credit Card, COD) □ Order summary and total cost □ “Pay Now” / “Confirm Payment” button
- Confirmation message (e.g., successful order notification)

Purpose:

Final step where users complete the transaction and receive confirmation.
